FARMERS, WAKE UP!

There is more profit in poultry for the outlay than in any other department of farm industry.

300 MILLIONS OF DOLLARS!

Reliable statistics show that 200 millions of dollars were expended for eggs, and 100 millions of dollars for poultry in the U. S. in one year. And yet the supply was greatly insufficient because farmers neglect this best paying portion of farming.

IMMENSE QUANTITIES OF EGGS

Are used in Calico-printing, Bookbinding, Clarifying Liquids, Gilding, Photography, etc., so that the demand for eggs is constantly increasing. Farmers cannot raise too many eggs.

WHAT FOWLS TO KEEP.

The best layers are Leghorns, Minorcas, Spanish, Hamburgs, Andalusians, Polands and Houdans.

Houdans, Spanish, Minorcas, Leghorns, Games, Polish and Javas lay white eggs.

Wyandottes, Plymouth Rocks, Brahmas, Cochins and Langshans lay dark-colored eggs.

Cochins, Plymouth Rocks, Dominiques, Wyandottes, Games, Langshans and Brahmas are good sitters.

Houdans, Leghorns, Minorcas, Spanish, Hamburgs, Andalusians and Polands, if full bloods, are poor sitters unless they have been highly fed.

The best table fowls are Brahmas, Plymouth Rocks, Wyandottes, Games, Dominiques, Houdans, Langshans and Cochins.

LIKE A GOLD MINE.

Take care of your fowls and they will take care of you. There are fortunes in raising **first-class** poultry and eggs and this book proves it.

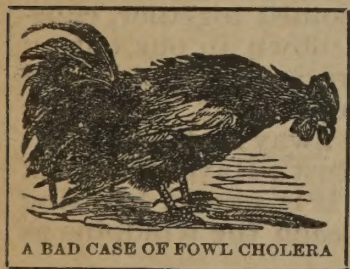

SAVE YOUR POULTRY!

IT is stated by the best authorities that nearly all the diseases of poultry are caused by either Cold, Wet, Want of Cleanliness, or Bad Feeding, and yet, in spite of every precaution taken, even in the best regulated poultry yards, diseases do exist, and often without any apparent cause.

We give a description of the principal diseases, with their symptoms; as well as directions for their cure. If our directions are faithfully followed success will be **certain** in nearly every case, no matter how **severe** the disease.

FOWL CHOLERA.

This disease is often so suddenly developed that, to all but close observers, fowls may be apparently well to-day and dead to-morrow. It is caused by the rapid multiplication of minute parasites which, although they principally attack the liver, pass wherever the blood circulates. It is especially a Summer disease, although it often occurs in Spring, Autumn, and during mild weather in Winter, particularly if

cold rains prevail. The usual symptoms of Fowl Cholera are great thirst, a nervous, anxious look and drooping spirits. Excessive thirst is the surest symptom of this disease. Sometimes the crop fills with wind and the comb becomes pale or dark. In a majority of cases the first symptom is a yellow coloration of that part of the droppings which is excreted by the kidneys, and which is usually pure white. This yellow coloring matter appears while the droppings are yet solid, and while the fowl is apparently well and has a good appetite. This is followed by diarrhoea, consisting largely of urates

suspended in a thin transparent mucus, and having a deep yellow coloration. In later stages of the disease this may change to a greenish or even deep green color. In the last stages fowls are exceedingly weak, light in weight, fall over at a touch, and walk with great difficulty. The duration of this disease varies greatly. Sometimes fowls die within 24 hours of the first yellow coloration of the urates. In other cases life is prolonged for three, four or five days, and, occasionally, for one or even two weeks. This shows the importance of careful watchfulness, and the necessity for prompt treatment. Nothing can cure this disease which does not destroy the parasite, and the only thing which does that is Rust's Havens' Climax Condition Powder, used exactly as directed.

GAPES.

The cause of this disease is the presence of worms (*Sclerostoma syngamus*) in the windpipe, which adhere firmly to the sides of the trachea, defying all efforts of the sufferers to expel them. These parasites are of a pale reddish color, the female measuring about half an inch in length, and the male about one-eighth of an inch; the male and female being joined together, causing a fork-like appearance, as is shown in our cut on another page. These worms are present in considerable numbers, and, unless promptly destroyed, cause the chicken to **gape** for breath, waste away and die. This disease is **prevented** by giving Rust's Havens' Climax Condition Powder in the feed. It is **cured** by using the Climax so that its vapor will reach the windpipe as directed on each package and box.

VERMIN.

Lice on fowls are much more prevalent than is generally supposed, and seriously interfere with the profits of poultry keeping. Examine your fowls frequently, particularly at the base of the tail feathers. Do this even if you feel sure they are free from vermin. If lice are found rub some of Rust's Havens' Climax Condition Powder among the feathers, as directed in each box and package, and wipe every roost once a week with a cloth wet with kerosene oil.

MOULTING.

Although a natural operation, Moulting is a strain on the fowl's constitution. Fat fowls and old ones suffer most in moulting, and make what is called "a bad moult." The treatment is to keep the fowl warm, avoid heating foods, and give Rust's Havens' Climax Condition Powder.

LEG WEAKNESS.

This trouble is usually occasioned by a lack of bone-making food, and is speedily removed by the use of that great bone and muscle maker, Rust's Egg Producer.

ROUP.

This infectious disease is usually most prevalent during the cold, wet days of autumn, winter and spring, although it may occur at any season. The symptoms, at first, resemble a severe cold, the fowl begins to droop, its appetite fails, it desires to drink frequently, coughs, sneezes, and frequently shows hoarseness. The nostril discharges a thick, colored, sticky mucous, with an offensive smell. In some cases the face and head swell; in others, the eyes become inflamed and contain frothy matter, and if the disease is not checked the fowl becomes blind, and finally dies. But all cases are not alike; some have some of the symptoms, and others have others; but few, if any, have all. In some, the eyes are much affected, while others have bad throats, loss of voice and weakness.

This disease should be treated by giving Rust's Havens' Roup Pills as directed on each box.

CATARRH.

Catarrh is popularly known as cold in the head. It is a very common disease, and frequently occurs in wet or windy weather. Roosting in a house with bad ventilation or with draughts, or too much top ventilation, frequently causes it. The symptoms are a clear, inodorous, watery discharge from the nostrils, frequent sneezing, poor appetite, eyelids usually slightly swollen, and an "out-of-sorts" condition generally. When Catarrh is

neglected it may develop into Roup. To cure this disease give Rust's Havens' Roup Pills.

DISTEMPER.

This is not considered a disease, and under certain favorable conditions Distemper is scarcely noticeable, but under other circumstances the fowl shows some of the following symptoms: Weakness, drooping of the wings, ruffled feathers, indisposition to go about much, apparent inflammation of the throat or bronchial tubes, gradual loss of flesh until the fowl seems to be almost "as light as a feather," although the appetite may be quite good. This wasting away, unless checked, results in the death of the fowl. Rust's Havens' Roup Pills should be given in these cases.

PIP.

Pip is not a disease in itself but is caused by Roup or some other disease that may close the nostrils and make the fowl breathe through the mouth, thus drying the tongue, on which forms a hard scale. It is **cruel** to remove this scale unless it is **entirely** loose. Apply a little butter or glycerine to the tongue to gradually loosen the scale, and treat for Roup or whatever has caused the trouble.

Pip and its cause are generally cured by Rust's Havens' Roup Pills.

FEEDING CHICKS.

Chicks need no food for the first 12 hours. After 12 hours hard boiled eggs and boiled cracked rice mixed with corn meal is best for them. After about 3 weeks give boiled cracked rice and corn meal for the morning feeds and wheat screenings, bread crumbs (either dry or soaked in sweet milk) boiled potatoes and finely cut cabbage for the remaining feeds. Add a tablespoonful of Rust's Haven's Climax Condition Powder to each quart of feed 3 or 4 times a week to prevent Gapes and other troubles and to improve their condition and hasten their growth and development. It pays well to do this. Try it.

If the chicks are sick add the Climax Powder 2 or 3 times a day.

Thoroughly mix the powder with the dry corn meal

and add cold water to make the mess **crumbly**. Don't use enough water to make it sticky.

Young chicks should be fed 5 or 6 times a day for their crops are very small. Their feed must be kept free from snow and dirt and no food should be left exposed after they have done eating. Give chicks a grass run if possible but they must not run out until the dew has dried from the grass. Coops must be kept very clean and are much more healthful if raised a little from the ground to avoid dampness.

FEEDING FOWLS.

Do not overfeed fowls or feed too much corn as it is fattening. Hens too fat do not lay well. Give plenty of gravel and exercise.

The advantage of giving Rust's Havens' Climax Condition Powder in the feed 3 or 4 times a week cannot be over-estimated. It prevents disease, keeps fowls in fine condition and early fits them for market or exhibition.

To get plenty of eggs at **all seasons** of the year see the directions on each box and keg of Rust's Egg Producer.

* FROM THE MAYOR.*

This is to certify that Wm. Rust & Sons is one of the oldest and most reliable firms in this city. A personal acquaintance with them for over a quarter of a century, justifies me in the above statement. The firm has the entire confidence of our citizens, and the worth and reliability of both them and their preparations are beyond question.—JAMES H. VAN CLEEF, Mayor of New Brunswick, N. J.

Poultry Raisers' Experience.

I have used Rust's Havens' Climax Condition Powder for five years and it cures fowls **every time** and keeps lice away.—BENJ. YOUNG, Franklin Park, N. J.

It saved four of my hens from Cholera.—A. L. HOLT, Agency U. S. Fire Ins. Co., Titusville, Pa.

It cured my sick hens after everything else had failed.—W. T. HIGGINS, Supt. Bloomfield Mills, Spotswood, N. J.

(See other pages for more letters).

HEN FARMING.

Although "Hen Farming" is the most profitable of all farming, many farmers think fowls worthy of little attention, thereby losing large profits.

The former serious discouragements connected with raising fowls, occasioned by disease, no longer exist, as letters received from nearly every state in the Union give ample evidence. Many about to abandon extensive poultry keeping, and some who had abandoned that industry, write that they have gone into it again.

Turkey raising is more difficult than chicken raising, but that, too, is made profitable by following our directions. These are facts well attested in a great many localities where Rust's Havens' Climax Condition Powder has been in regular use for several years.

In fact we have never heard of a failure to cure either **Fowl-cholera** or **Gapes** with it, where our directions were **faithfully followed**, unless treatment was delayed too long. Letters which we have published from time to time, in various circulars, show that fowls nearly lifeless have been quickly cured by giving Rust's Havens' Climax Condition Powder as directed for the severest cases. None, therefore, should despair of saving their fowls. This is a strong statement, but it has been verified time and time again.

In Diarrhoea, Debility, Indigestion, Liver Diseases, Rheumatism, &c., Rust's Havens' Climax Condition Powder is equally successful. It enriches the Blood, tones up the Liver, promotes the digestion and restores the appetite. Mild cases of Catarrh and Roup yield to its use, and severe cases of these serious diseases seldom fail to be cured by our Roup Pills and Climax together.

But an ounce of prevention is worth many pounds of cure, and the most successful poultry keepers do not wait until disease has invaded their flocks. Fowls need to be **kept in condition** even more than horses, and only those who act upon this fact get conspicuous success with fowls.

The regular use of Rust's Havens' Climax Condition Powder in the feed, 3 or 4 times a week, beginning soon after the chicks are hatched, will nearly always keep fowls free from disease and more quickly develop them

in beauty, plumpness and vigor. A single pound of the powder is generally sufficient to bring a fowl safely from birth to maturity. When the powder is bought in five pound boxes, a pound costs only twenty cents, and this small cost is more than saved in feed for the reason that the powder causes all the feed eaten to be thoroughly digested and assimilated. But the great saving consists in the prevention of loss by disease, the increase in the size, weight and value of the fowl, and the shorter time required to feed and bring the fowl to fitness for market or laying. If incredulous, try it on a few fowls and see for yourself.

We give all the letters we have room for; our difficulty being to know which to select from the great number we have. It will be noticed that we always give the post-office address of each writer and that many are from our own locality.

Poultry Raisers' Experience.

Rust's Havens' Climax Condition Powder is excellent for Cholera and Gapes. It cured a hen almost dead with Cholera and so weak she could not stand. I did not think she could live twenty-four hours and was going to kill her, but my little girl dosed her with your powder. She could not swallow, so it had to be mixed with water and poured down her throat. In four days she was cured.—TAYLOR MOUNT, Englishtown, N. J.

To revive drooping chicks, to render fowls healthy, and to remove vermin from their premises, I have never found its equal. It only needs to be known to be used everywhere.—REV. S. L. B. CHASE, late of Methuen, Mass.

I find it invaluable in Fowl-Cholera.—N. T. PARKER, Agent Aetna Ins. Co., New Brunswick, N. J.

I don't think I could raise poultry without it.—T. H. PENNEPACKER, Hainesville, Kent Co., Md.

Rust's Havens' Climax Condition Powder is a great thing for poultry, no matter what may be wrong with them.—MRS. L. JUNE GILBERT, June Farm, Salem Centre, Westchester Co., N. Y.

It cured ten fancy bantams which were nearly dead.—JOHN HIGGINS, 901 Magnolia Ave., Elizabeth, N. J.

Poultry Raisers' Experience.

Of 96 *Turkeys* I lost 60 by Cholera. Then I heard of your powder and saved all the remaining 36 except one, which was too far gone for treatment. I believe I could have saved the 61 I lost, had I got your powder soon enough. The next year I used it as a preventive once or twice a week and brought 125 turkeys out of 129 through the season. I have used Rust's Havens' Climax Condition Powder for 3 years and do not believe that fowls can possibly get Cholera if it is used. I cannot make turkey raising profitable without it. It is equally useful in fattening.—LISCOMB B. REED, Princeton Junction, N. J.

It has no equal for curing gapes. My neighbors think so too.—MAGGIE E. SCHRADER, Beechy Mire P. O., Union Co., Ind.

I have used it for 6 years and it never failed to cure Chicken-Cholera and Gapes. It clears out Vermin and keeps fowls healthy.—AUGUSTUS GUNTHER, Harlingen, N. J.

I tried everything I could hear of, but nothing did any good until I tried your powder. It works like a charm.—A. C. BRINK, Springville, Pa.

I lost 30 laying hens from Cholera, I tried everything I knew of and would have lost 200 if I had not heard of your powder in time to save them.—WM. KIEFT, Pleasant Valley Poultry Yard, Middletown, Conn.

Grandest remedy ever discovered. I used it last year and raised 500 chickens and don't think I lost one from Cholera. Those of my neighbors who did not use it lost great numbers.—MRS. J. WILSON, Madisonville, Ky.

I have used it for years. It has no equal as a cure for poultry diseases. It is just the thing to use when fitting birds for exhibition.—J. C. LONG, Jr., Ex.-Pres. N. Y. Fanciers Ass'n, Astoria, N. Y.

I would not be without it.—MRS. H. SPENCER, Huntsville, O.

I lost over \$100 worth of Chickens and Turkeys by Cholera last winter. In a very few days after using Rust's Havens' Climax Condition Powder the disease disappeared. If I had not used it I believe I would have lost every fowl I had.—JOHN SPERLING, New Brunswick, N. J.

I know it saved my poultry when all other remedies had failed.—GEORGE H. LYMAN, Durham, Conn.

I cannot say too much in praise of it.—S. B. DINIUS, Roanoke, Ind.

I lost 6 chickens by Cholera, and 30 more had it bad, but I cured the 30 with your Powder. That 50 cents saved me ten dollars.—W. Y. HENDERSHOT, Flemington, N. J.

I don't like to be without it *one day*.—LEWIS ANDERSON, Oakwood, Vermillion Co., Ill.

I hatched 400 chicks in one month and, using your powder, did not lose one. It also saved two geese that were too sick to eat or drink.—LOUIS BODE, Valley Stream (L. I.) N. Y.

It is the only thing I have ever found that could surely cure poultry diseases and keep fowls in perfect health.—P. S. POLHEMUS, Rocky Hill, N. J.

I should have lost half of my flock but for the timely use of it.—LINIE HUBBS, Jericho, Queens Co., N. Y.

When a man talks chicken to me, I talk Rust's Havens' Climax Condition Powder to him.—G. W. SMITH, Vandalia Freight House, Terre Haute, Ind.

The best on earth. I have never lost a fowl since I have used it.—L. S. CARTER, Hammond, Ill.

It is the only thing I know of that will cure Gapes.—F. C. ENSWORTH, New Britain, Conn.

Your powder cured a hen so bad with Cholera that she could not stand or hold up her wings, but would roll over on her back. I had to wet the powder and put it down her throat.—W. H. BENEDICT, New Brunswick, N. J.

A Chance to Make Money.

There is much money in Eggs and Poultry, for, under the old tariff about 200 millions of eggs were annually imported because not enough were produced here, and the enormous demand is constantly increasing, and should be entirely supplied by our own poultry keepers. This can easily be done, because you can feed for Eggs and Poultry Flesh just as you can feed for Milk, Beef and Fat Pork.

And as you can get plenty of Eggs at all seasons by using Rust's Egg Producer, **Not One** Egg need be imported.

It makes fowls vigorous and healthy, shortens the moulting period, prevents and cures leg weakness, etc., and is just what is needed to make poultry keeping the most profitable operation on a farm or place. Remember that every hen is dead expense when not laying, and that it costs only one cent to feed a hen every day for two or three weeks with Egg Producer. No other investment of its size pays so well as this, because hens **must lay** if Rust's Egg Producer is fed.

Farmers lay up money and ladies get plenty of "pin-money" by using it; for although eggs are often dear Rust's Egg Producer is always cheap. Read what the people say.

I find Rust's Egg Producer just the thing to make hens lay. We have about sixty hens and are now getting about 40 eggs a day on an average. Yesterday (January 8th), we got 49. Our neighbors are getting but few eggs, and we tell them to use Rust's Egg Producer and they can get the same results that we do—ELIAS D. ERVIN, Cranbury, N. J.

I know Rust's Egg Producer makes hens lay.—JAMES L. HANCHETT, Sec'y Western Mass. Poultry Ass'n, Westfield, Mass.

It works like a charm.—B. L. WILLIAMS, West Orange, N. J.

I never got such results as since using Rust's Egg Producer.—R. FINCK, Breeder of Pit Games, 200 E. Gray St., Louisville, Ky.

I have used Rust's Egg Producer for two years. Winter before last I had about 45 hens and got from 20 to 30 eggs a day through all the snows and coldest weather. Last winter from about 50 hens I got from 2½ dozen to 3 dozen a day. At the same time some of our neighbors complained they did not get enough for their own use, although they had more hens than we had.—MRS. H. R. CONKLIN, Dunham's Corner, N. J.

Rust's Egg Producer gave a marked increase of Eggs with better condition of hens and ducks than ever before.—AQUILA RICH, New Brighton, Staten Island, N. Y.

I have 35 hens. Early last spring I used Rust's Egg Producer and got from 18 to 24 eggs a day, week in and week out.—MRS. M. J. VAN VOAST, 258 Hale St., New Brunswick, N. J.

I believe Rust's Egg Producer to be the only reliable egg food.—MRS. SARAH E. ROBBINS, Jericho, Queens Co., N. Y.

I know Rust's Egg Producer will do just what is claimed.—RICHARD KIRBY, dealer in farm and fancy fowls, pigeons, &c., 62 Cortlandt St., New York.

I used Rust's Egg Producer, and from 27 hens we averaged 130 eggs a week during the early spring months. It is health-producing as well as egg-producing.—MRS. M. J. BARTLE, 90 Church St., New Brunswick, N. J.

I think Rust's Egg Producer the best Egg food made, and my fowls never looked so good as while I was using it.—M. DAVENPORT, Mgr. Pineland Poultry Yards, Englishtown, N. J.

We have tried Rust's Egg Producer with excellent success. It should be in every poultry house.—P. H. JACOBS, Editor of "*The Poultry Keeper*," May, 1888, page 24.

Rust's Egg Producer has made eggs plentiful in our neighborhood.—MRS. W. B. PARKER, West Creek, Ocean Co., N. J.

I used Rust's Egg Producer with splendid results.—MARY E. STULTS, Cranbury, N. J.

Rust's Havens' Roup Pills.

It was formerly the habit of fanciers, farmers, and others, whenever Roup, &c., appeared in a flock, to kill the fowls affected and remove them immediately to prevent the spread of the disease. This practice is, happily, no longer necessary since the introduction of Rust's Havens' Roup Pills, as is shown by the letters which we publish. These diseases are usually curable unless neglected too long or complicated with Scrofulous or other incurable taint (transmitted by breeding), if the directions are carefully followed.

These pills act directly on the glands and mucus membrane, allay all tendency to fever and carry off all morbid matter from the system.

They are entirely free from everything harmful and are believed to be the best remedy ever discovered for Roup, Catarrh, Colds and Distemper.

They are unlike any other medicine and, being composed of medicines in concentrated form, they are of moderate size, and, therefore, easy to give to fowls.

A box of Rust's Havens' Roup Pills saved a valuable cockerel which had Roup so bad that I did not think he could live.—THOMAS L. ROE, Poultry breeder, Patchogue, Long Island, N. Y.

I never found anything so effectual as Rust's Havens' Roup Pills. I shall never be without them.—W. B. WOOD, Cashier N. Y., L. E. & W. R. R., and breeder of Wyandottes, Jamestown, N. Y.

Rust's Havens' Roup Pills are simply wonderful! Less than a box completely cured a fowl severely afflicted with Roup and so weak that she was unable to stand. She had lost nearly all her flesh and my wife wanted her killed.—CHAS. TRUEX, Harness Dealer, Freehold, N. J.

Rust's Havens' Roup Pills are a perfect success in Roup. They cured a hen so reduced in flesh and strength that she could not stand.—PETER H. QUACKENBUSH, Manalapan, N. J.

Rust's Havens' Roup Pills and Powder cured my fowls entirely.—ABRAM WOLFE, Lebanon, N. J.

HORSES, CATTLE, SHEEP, HOGS, ETC.

Experience shows that Rust's Havens' Climax Condition Powder is equally good for all kinds of stock. And there is no reason why this should not be the case; for the health of all animals depends upon the proper working of the various organs.

Still this fact seems to surprise some of its greatest admirers who, at first, finding it to be the only reliable cure for poultry diseases, looked upon it as "an extraordinary poultry powder;" others referred to it as "a wonderful horse powder;" still others as "a great cattle powder" or "remarkable hog medicine," according to the kind of stock they had used it for.

But sooner or later, however, every one finds it just what is needed for all stock and just the thing to have always at hand in the stable, barn or poultry house.

It is unlike any other powder and warranted free from Antimony, Arsenic, Rosin, Saltpetre and every harmful ingredient. It is, therefore, confidently recommended to all who are careful of their stock.

It is so easy to "puff up" animals and quickly give them fine glossy coats, with the temporary **appearance** of health and vigor, by the use of Antimony or Arsenic, that a great many advertised powders are loaded up with the former or contain some of the latter. Such powders **seem** to give great benefit at first, but they open the pores too freely and render the animal liable to take cold. Soon after their use is discontinued the animal gradually falls below his former condition. This shows them to be **mere stimulants**, and, therefore, positively harmful.

When an animal is run down he needs **building up**, not stimulating. If diseased he wants the healthful action of his various organs restored. If his blood is thin and disordered it must be enriched. When his liver, kidneys or urinary organs are not in good working order, these should be toned up to the standard of health.

That all these results can be easily accomplished the reader is referred to what practical men have written and which will be found on another page. Of these writers many have lived long in our neighborhood (where we have been engaged in business for about forty years), and their experience with Rust's Havens' Climax Condition Powder has been long, thorough and successful in diseases of animals, some of which had defied all other treatment.

This powder can be used with great advantage at **any season** and in **any weather**. Use it every spring for your horse's blood. Use it when he is shedding, his appetite poor, and when he is ailing or does not thrive. It will more than satisfy you; it will **delight you**, for the good it does is **real** and **lasting**.

Try it for diseases of Cattle, for loss of appetite, failing of milk and giving of watery or bloody milk.

When given regularly for a few weeks its good effects are plainly seen in the improved condition of the animal and the increased quantity and improved quality of the milk and butter. Test this by measuring and examining your milk and weighing your butter before and after using Rust's Havens' Climax Condition Powder for a while.

When fed to **Calves** it greatly improves their growth and prevents scouring. Fed to sheep it greatly improves their condition and assists in fattening. It also increases the quantity of **Milk in Ewes having Lambs**.

The success of this powder is extraordinary in such disorders of **Hogs** as Coughs, Worms, Swollen Necks, Ulcers of the Lungs and Liver, Failure of Food to **produce Fat**, or **Growth**, Poor Appetite, etc. It enriches the Milk of **Sows raising Pigs**, causing them to thrive well. Try this. When fed regularly for a time it **expels** all **worms** and wonderfully improves the condition of Hogs. If you have a very sick Hog you can generally save him by mixing Rust's Havens' Climax Condition Powder with sweet milk and feeding him from a spoon—it being often easier to feed a sick Hog from a spoon than from a bottle.

Unfortunately nothing yet discovered will cure severe cases of genuine Swine Plague or Hog Cholera. The

best that can be done is to **prevent** it by keeping up the health and vigor of hogs. In this opinion we are supported by the Department of Agriculture (Bureau of Animal Industry) at Washington, D. C.

In conclusion, let us impress the fact upon owners of stock, that it is not that which is merely eaten that nourishes an animal but that which is **digested**. One animal eats much and grows thin; another animal eats much less and grows fat and thrifty. A smaller quantity well digested (and this powder ensures that) produces better results than a larger quantity of feed when much of it passes through the system only partly digested.

No fact is more clearly established than that it is true economy to keep up a high standard of health in one's stock. More and better work can be gotten from horses, more milk and butter from cows, more wool from sheep, more beef, mutton and pork from cattle, sheep and hogs, more profit from poultry. In the saving of feed alone it is money in the pocket to use Rust's Havens' Climax Condition Powder. It is not a bulky "food" but an honest medicine at an honest price.

Horsemen's Letters.

My horse had yellow water and I could not use him, but your powder cured him in a few days.—CHARLES H. HERBERT, Jamesburg, N. J.

A perfect cure for common worms and pin-worms in horses.—JACOB M. APPLGATE, Harmony, N. J.

Rust's Havens' Climax Condition Powder is the best thing for a cough or cold and worms in horses I ever used. It cures in 3 or 4 doses.—AUGUSTUS GUNTHER, Harlingen, N. J.

It cured my horse of a bad cough with symptoms of Epizootic.—JAMES R. DUNHAM, New Market, N. J.

The best powder in use. I shall use no other.—C. C. VAN DOREN, Franklin Park, N. J.

Letters From Stock Owners.

Although Heaves is Incurable, Read What Wonderful Benefit Can be Gained by Using Our Powder.

My horse had heaves so bad that if I had not needed him very much I would have wished him to die. Rust's Havens' Climax Condition Powder has made him as useful as ever he was.—WM. H. PLUMLEY, New Brunswick, N. J.

I had a mare as bad with heaves as I ever saw but after using your powder she never shows it to any extent, except when pulling a very heavy load. It is also the best thing for the appetite of horses I ever used.—PETER SYLVESTER, Middlebush, N. J.

Three years ago one of my cows calved, and the calf was dead. The cow was very weak and I gave her your powder. In 24 hours from the first dose she cleaned all right, but was so weak for several days we had to help her up. I gave the powder until she was well. She is living to-day, saved by one package of your powder.—SAM'L B. VOORHEES, Blawenburgh, N. J.

Thanks to your powder I saved a cow. She got very thin and I thought I would lose her. She could not eat and at first I had to make the powder into balls to get it down.—ISAAC CORTELYOU, Franklin Park, N. J.

I saved a cow and a whole pen of hogs by using your powder. The cow had hollow horn and wolf.—WM. C. LESTER, Monmouth Junction, N. J.

I had two pigs so sick they would not eat. One could not get up and I gave him a dose of your powder in milk, down his throat, after that he got up and ate it himself and got well after using half a package. The other pig was cured by the rest of the package.—JONATHAN ACKERMAN, Dayton, N. J.

I have used Rust's Havens' Climax Condition Powder for several years, with success in every instance, even when the hogs were down and refused to eat, when I drenched and cured them.—JONATHAN JOHNSTONE, Fayette Co., Ky.

PRICES.

(All net weights.)

Rust's Havens' Climax Condition Powder.

13 oz. package, 25 cents; if by mail, 40 cents.

32 oz. box, 50 cents; if by mail, 85 cents.

5 lb. box (equal to six 25 cent packages) One Dollar.

The dollar size is the favorite with Farmers, Livery Stable keepers, Poultry Fanciers, etc. This size is too large for mailing, but can be sent by express or freight.

The notice below shows how to save the freight.

Rust's Havens' Roup Pills.

25 cents per box of 48 pills. Mailed on receipt of price.

Rust's Egg Producer.

1 lb. box, 25 cents; if by mail, 44 cents.

2½ lb. box, 50 cents; if by mail, 94 cents.

6 lb. box, \$1.00	}	These three sizes are too large for mailing, but can be sent by express or freight.
10 " 1.50		
25 lb. keg, 3.50		

The notice below shows how to save the freight.

NOTICE.

To places East of the Mississippi River where we have no Agent, we will send (freight paid to your Railroad Station)

TWO DOLLARS WORTH OR MORE

of either or all of the above preparations on receipt of the money. Remember to say whether you wish Rust's Havens' Climax Condition Powder, or Roup Pills, or Rust's Egg Producer, or all three preparations. And say just what sizes you want. To places beyond the Mississippi we pay freight to that river on such orders.

WM. RUST & SONS, New Brunswick, N.J.

SOLE MANUFACTURERS.

ONE LIVE AGENT WANTED IN EVERY PLACE.

FROM THE MAYOR.

This is to certify that Wm. Rust & Sons is one of the oldest and most reliable firms in this city. A personal acquaintance with them for over a quarter of a century, justifies me in the above statement. The firm has the entire confidence of our citizens, and the worth and reliability of both them and their preparations are beyond question.—JAMES H. VAN CLEEF, Mayor of New Brunswick, N. J.

IT WILL PAY YOU

To Read this Book

IF YOU HAVE

Horses, Cattle, Hogs or Poultry.
